

Supplementary Table 1: In each region, the numbers of facilities that performed presymptomatic genetic testing and of clients at each facility

Region	Facility, N (%)	Client, N (%)
Hokkaido/Tohoku	6 (6.9)	53 (7.8)
Kanto	30 (34.5)	314 (46.3)
Chubu	16 (18.4)	100 (14.8)
Kinki	18 (20.7)	145 (21.4)
Chugoku/Shikoku	8 (9.2)	22 (3.2)
Kyushu/Okinawa	9 (10.3)	44 (6.5)
Total	87 (100)	678 (100)

This table shows the regional distribution of facilities that were consulted about presymptomatic genetic testing and of the clients' numbers. Of the facilities that responded to this study, 34.5% (30 facilities) were located in Kanto region, and 46.3% (314 clients) were visited those facilities.
