

Chair : Taku Hatano

Juntendo University School of Medicine

LB-1 Factors Influencing the Rehabilitation Impact on lateral flexion in Parkinson's Disease.

Kyohei Mikami

Department of Rehabilitation, Noborito Neurology Clinic, Japan

LB-2 Dopaminergic correlates of regional brain perfusion in Parkinsonian disorders

Yoshikazu Nakano

Department of Neurology, Graduate School of Medicine, Chiba University, Japan/ Department of Neurology, Chibaken Saiseikai Narashino Hospital, Japan

LB-3 Distribution of α -synuclein oligomers in LRRK2 Parkinson's disease brains

Sekiya Hiroaki

Department of Neuroscience, Mayo Clinic, Jacksonville, Florida, USA/ Division of Molecular Brain Science, Kobe University Graduate School of Medicine, Japan/ Division of Neurology, Kobe University Graduate School of Medicine, Kobe

LB-4 Confirmatory results of a phase 3 trial of ultra-high dose methylcobalamin for early-stage ALS

Ryosuke Oki

Department of Neurology, Tokushima University Graduate School of Biomedical Sciences, Japan/

LB-5 TDP43 accumulates in intramuscular nerve bundles of ALS patients

Takashi Kurashige

Department of Neurology, National Hospital Organization Kure Medical Center and Chugoku Cancer Center, Japan/ Department of Clinical Neuroscience and Therapeutics, Graduate School of Biomedical and Health Sciences
